ERGOPLUS

ERGOPLUS [en]

The highly renowned ERGOPLUS MIG torch has been updated to a new standard. In addition to the new ergonomic design, significant improvements have been made to the welding performance of the ERGOPLUS MIG torch.

The handle of the new ERGOPLUS is made of two components, rubber and plastic. Rubber textures are located on the top and the underside of the handle surface areas, where the human hand needs to hold the handle naturally and precisely.

One of the key features in the ergonomic design of the ERGOPLUS is the detachable pistol grip handle.

The ERGOPLUS has been fitted with a sealed microswitch trigger.

MIG welding torches

ERGOPLUS [it]

La rivoluzionata torcia MIG ERGOPLUS è stata rinnovata ad un nuovo standard. Oltre al nuovo design ergonomico, sono stati apportati importanti miglioramenti alle prestazioni di saldatura della torcia MIG ERGOPLUS.

L'impugnatura della nuova torcia ERGOPLUS è composta da due componenti (gomma e plastica). Le parti in gomma si trovano sulla parte superiore e inferiore, dove la mano del saldatore esegue la presa in modo naturale e preciso. Una delle caratteristiche chiave del design ergonomico della torcia ERGOPLUS è l'impugnatura a pistola rimovibile.

La torcia ERGOPLUS è dotata di un pulsante a microinterruttore sigillato.

ERGOPLUS [de]

Wir haben unseren renommierten ERGOPLUS MIG-Brenner komplett optimiert und erneuert. Neben dem neuen ergonomischen Design wurde auch die Schweißleistung des ERGOPLUS MIG-Brenners erheblich verbessert.

Der Griff des neuen ERGOPLUS besteht aus zwei Komponenten, Gummi und Kunststoff. Die Gummiregionen befinden sich auf der Ober- und Unterseite der Griffoberfläche, wo die Hand den Griff natürlich und präzise halten muss.

Eines der wichtigsten Merkmale des ergonomischen Designs des ERGOPLUS ist der abnehmbare Pistolengriff. Der ERGOPLUS Brenntaster ist mit einem geschützten Mikroschalter ausgestattet.

ERGOPLUS [fr]

La célèbre torche MIG ERGOPLUS a été repensée selon un nouveau standard. En plus d'un design ergonomique modernisé, des améliorations significatives ont été apportées pour optimiser ses performances de soudage. La poignée, composée de deux matériaux – caoutchouc et plastique –, présente des zones texturées en caoutchouc sur le dessus et le dessous, là où la main se positionne naturellement pour une prise en main précise et confortable.

L'un des atouts majeurs du design ergonomique d'ERGOPLUS est sa poignée pistolet détachable, offrant une flexibilité accrue. La torche est également équipée d'une gâchette à micro-interrupteur étanche, garantissant fiabilité et sécurité.

ERGOPLUS [tr]

Kaynak ürünleri pazarında son derece ünlü ERGOPLUS MIG torçları yeni bir standardı karşılayacak şekilde yenilendi. Yeni ergonomik tasarıma ek olarak, ERGOPLUS MIG torçlarının kaynak performansında da önemli iyileştirmeler yapıldı. Yeni ERGOPLUS kabza, kauçuk ve plastik olmak üzere iki bileşenden oluşur. Kabza üzerindeki kauçuk dokular, operatörün kabzayı doğal ve hassas bir şekilde tutabilmesine olanak sağlayacak şekilde kabzanın üst ve alt yüzey alanlarında bulunur.

ERGOPLUS'in ergonomik tasarımındaki en önemli özelliklerden biri, çıkarılabilir piston kabzadır. ERGOPLUS, izolasyonlu bir mikro-switch tetik ile donatılmıştır.

ERGOFRESH

ERGOFRESH [en]

The new ERGOFRESH is our answer to the demand for better safety. With the ERGOFRESH fume extraction MIG torch, a welder and their colleagues will breathe clean air rather than the fumes created during the welding process. The extraction efficiency for all ERGOFRESH models has been measured according to new standard ISO 21904.

The ERGOFRESH gas nozzle and vacuum nozzle combination is patent pending.

The ERGOFRESH handle is equipped with a bypass lid. The lid is located under the welder's thumb when they are holding the torch by the standard handle.

ERGOFRESH [it]

La nuova torcia ERGOFRESH è la nostra risposta alla richiesta di maggiore salute e sicurezza. Grazie alla torcia MIG con l'estrazione dei fumi ERGOFRESH, il saldatore e i suoi colleghi possono respirare aria pulita anziché i fumi creati durante il processo di saldatura. L'efficienza dell'estrazione dei fumi per tutti i modelli ERGOFRESH è stata misurata in conformità al nuovo standard ISO 21904. La combinazione dell'ugello del gas ERGOFRESH e dell'ugello di aspirazione è in attesa di brevetto. L'impugnatura della torcia aspirafumo ERGOFRESH è dotata di un coperchio bypass. Il coperchio si trova sotto il pollice del saldatore quando la torcia viene utilizzata con l'impugnatura standard.

ERGOFRESH [de]

Der neue ERGOFRESH ist unsere Antwort auf diese Nachfrage nach mehr Sicherheit. Mit dem ERGOFRESH MIG-Schweißbrenner mit Rauchabsaugung atmen Schweißer und ihre Kollegen saubere Luft und nicht den giftigen Schweißrauch ein. Die Absaugleistung aller ERGOFRESH-Modelle wurde nach der neuen Norm ISO 21904 gemessen. Die Kombination der ERGOFRESH Gasdüse und Absaugdüse ist zum Patent angemeldet. Der ERGOFRESH-Griff ist mit einem Bypass-Deckel ausgestattet. Der Deckel befindet sich unter dem Daumen des Schweißers, wenn er den Brenner in der Hand hält.

ERGOFRESH [fr]

La nouvelle torche ERGOFRESH est notre réponse à la demande croissante de sécurité. Grâce à cette torche MIG aspirante, le soudeur et son environnement respirent un air plus pur, plutôt que les fumées générées pendant le soudage. L'efficacité d'extraction de tous les modèles ERGOFRESH a été mesurée selon la nouvelle norme ISO 21904. La combinaison innovante de la buse gaz et de la buse d'aspiration ERGOFRESH est en attente de brevet. Pour un confort optimal, la poignée ERGOFRESH est équipée d'une trappe positionnée sous le pouce du soudeur lorsqu'il tient la torche par la poignée standard.

Yeni ERGOFRESH, daha yüksek güvenlik talebine verdiğimiz cevaptır. Kaynakçılar ve aynı ortamda bulunan diğer çalışanlar, ERGOFRESH duman tahliye özelliğine sahip MIG torcu sayesinde, kaynak işlemi sırasında ortaya çıkan dumanları değil, temiz havayı solurlar. Tüm ERGOFRESH modellerinin tahliye verimliliği, yeni ISO 21904 standardına göre ölçülmüştür. ERGOFRESH gaz nozulu ve vakum nozulu kombinasyonu patent beklemektedir. ERGOFRESH kabza üzerinde bir baypas kapağı bulunur. Kapak, torcun standart kabza ile kullanılması esnasında kaynakçının başparmağının altındadır.

Protection gas flow is usually guttered by a STANDARD ceramic nozzle (Figure 1).

Such flow is affected by turbulences of torch head which are caused by the inlet pressure. In order to assure a uniform gas distribution, above all in stainless steel, titanium and aluminium alloys welding, we suggest the use of GAS LENS spare parts. The electrode holder equipped with a gas lens net, uniformes the flow (Figure 2) and aid to save the protection gas. Where permitted by external dimensions, it is recommended the JUMBO version which increases the protected surface with advantage for welding quality (Figure 3).

Protection gas flow is usually guttered by a STANDARD ceramic nozzle (Figure 1).

Such flow is affected by turbulences of torch head which are caused by the inlet pressure. In order to assure an uniform gas distribution, above all in stainless steel, titanium and aluminium alloys welding, we suggest the use of GAS LENS spare parts. The electrode holder equipped with a gas lens net, uniformes the flow (Figure 2) and aid to save the protection gas. Where permitted by external dimensions, it is recommended the JUMBO version which increases the protected surface with advantage for welding quality (Figure 3).
